

# Keck Hospital of USC

Every day at **Keck Hospital of USC**, physicians, nurses and staff go beyond the science of exceptional medicine to bring patients breakthroughs in the art of caring.

Keck Hospital, a 401-bed acute care hospital, is part of Keck Medicine of USC, the University of Southern California's medical enterprise. Its internationally renowned physicians employ the latest medical innovations while working together across disciplines, all to ensure the best outcome possible for each patient.

## Exceptional Capabilities

- Keck Hospital of USC provides innovative care for complex medical and surgical issues. Highly trained specialists in each area provide every patient with an individualized yet extensive care plan.
- Keck Hospital physicians treat the most acutely ill patients with some of the most advanced techniques in the world. Hundreds of clinical trials are currently taking place at Keck Hospital of USC and its affiliated research institutions, giving participants access to novel and promising therapies that generally are not available elsewhere.
- Combining exceptional scientific research with compassionate care, Keck Hospital goes beyond exceptional medicine to deliver the right therapy at the right time to meet each patient's specific needs.

## Major Services

Keck Hospital of USC physicians are leaders in the diagnosis and treatment of many diseases, as demonstrated by innovations in patient care.

### Cancer

For more than 40 years, USC Norris Comprehensive Cancer Center has been advancing cancer research and revolutionizing personalized patient care. Clinicians and scientists pursue breakthroughs in innovative surgical techniques and novel cancer treatments that lead to better outcomes for patients.

### Cardiovascular

The USC Cardiac and Vascular Institute boasts a wide range of specialists in all areas of heart and vascular care, so there's no need to go anywhere else for the latest options. Our specialists work together to develop a coordinated care plan tailored specifically for you.

### Dermatology

Keck Medicine of USC dermatologists are known for their extensive clinical expertise in the management of rare and common skin diseases, such as psoriasis, atopic dermatitis, skin cancer, infectious diseases, autoimmune diseases and immunobullous diseases.

### Lung

Keck Hospital of USC is among the first centers in the U.S. to offer bronchial thermoplasty, an outpatient treatment that provides long-lasting control of severe asthma.

### Neurosciences

Keck Medicine of USC surgeons were the first in the U.S. to treat uncontrolled epilepsy by implanting the world's only responsive neurostimulation system approved by the U.S. Food and Drug Administration. They are also advancing surgical techniques that may restore motion control to those with paraplegia.

### Ophthalmology

Physician-scientists from the USC Roski Eye Institute developed the world's first implantable artificial retina that restores vision to those blind due to retinitis pigmentosa. They preserve and enhance vision through advanced procedures for the full spectrum of eye disease.

### Orthopaedics

USC Orthopaedic Surgery physicians are the official doctors of USC Trojan athletes. They have worked or are currently working with many professional teams, including the Los Angeles Angels of Anaheim, Los Angeles Dodgers, Los Angeles Lakers, Los Angeles Galaxy, Los Angeles Kings, Anaheim Ducks and U.S. Women's national soccer team.

### Otolaryngology

Surgeons and audiologists from the USC Caruso Department of Otolaryngology – Head and Neck Surgery were part of the first team to activate an FDA-approved auditory brain stem implant in a child in the U.S. They also routinely restore hearing through cochlear implants.

### Spine

USC Spine Center physicians provide the most advanced, minimally invasive surgical treatments for patients with degenerative and complex spinal disorders.

### Transplantation

The USC Transplant Institute offers the most advanced treatments available, including living-donor liver transplants and transfusion-free transplants. We have excellent outcomes for heart, kidney, liver and lung transplant patients.

### Urology

USC Urology pioneers advanced surgical procedures and its physicians are experts in laparoscopic and minimally invasive surgeries.
