

USC PREMIER CARE

Transitioning from Hospital, ER or Service to Home

It is common for patients to have questions and concerns after a hospital stay, even after undergoing routine procedures. USC Premier Care provides comprehensive support services completely free of charge to patients across the Keck Medicine of USC health system to make sure the transition goes smoothly.

Our USC Premier Care team will:

- Answer any questions regarding your treatment.
- Help you understand the next steps for your care following your recent health care treatment.
- Connect you with doctors and nurses who can answer medical questions after hours, on weekends, and holidays.

Our team works alongside your physicians, nurses and other medical professionals to make managing your health care easier and personalized to your needs. We will ensure you are involved in decisions about your care and that you and your family have the necessary support to get you back to good health.

SERVICES INCLUDE:

Discharge planning: USC Premier Care will make sure you are ready to return home and connect you with support services, such as skilled nursing facilities or home health agencies, if necessary.

Scheduling: USC Premier Care will coordinate your follow-up appointments with your primary care and specialty physicians to monitor your recovery after you go home.

Community services support: We will help you find support options and community resources for everyday living for you and your family. We also offer rapid referrals to social work if necessary.

Medication management: Our USC pharmacists can help you make sure you and your family understand your medications and how to take them properly.

Health education: We will provide you with education to manage your health.
