

PANCREATIC AND HEPATOBILIARY SURGERY

Expert care for complex pancreatic and biliary conditions in Newport Beach

Keck Medicine of USC's Pancreatic and Hepatobiliary Surgery team is reputed for its cutting-edge expertise in complex abdominal surgeries. Our program, which includes Keck Medicine of USC – Newport Beach, has been designated a Center of Excellence by the National Pancreas Foundation. We specialize in both advanced tertiary and quaternary care.

Our multidisciplinary approach to care results in exceptional clinical outcomes for the treatment of pancreatitis and other pancreatic and hepatobiliary conditions. Many physicians refer their patients to Keck Medicine because our surgeons have acquired deep, hands-on experience with complex abdominal surgery cases.

We're proud to bring advanced surgical techniques to the community at Newport Beach. At Keck Medicine of USC – Newport Beach, our personalized approach ensures your patients get the best possible surgical care.

WORLD-CLASS CARE FROM KECK MEDICINE OF USC

Our surgeons are fellowship-trained, with expertise in malignant and benign diseases of the liver, kidneys and pancreas. Our physicians are at the top of their field, pushing each other to provide state-of-the-art care each day.

Our number-one priority is our patients' safety and comfort. As such, we are experts in minimally invasive surgery. We also offer transfusion-free procedures to all patients.

The collaboration we practice extends to our relationships with referring physicians, case managers and other health care partners. Because many of our referred patients have complex medical issues, we aim to make the referral and transferring process as easy as possible.
