

Keck Medicine of USC

WORLD-CLASS INTERVENTIONAL RADIOLOGY

Our experts offer minimally invasive image-guided procedures to diagnose and treat a wide variety of conditions.

At Keck Medicine of USC, our interventional radiologists perform advanced, minimally invasive, image-guided procedures for a broad range of conditions. We combine technical precision with comprehensive clinical care to provide evidence-based therapies that optimize outcomes and minimize complications.

As part of the Keck Medicine academic health system, we collaborate with experts in surgery, gastroenterology, oncology, vascular medicine and other specialties to provide personalized, multidisciplinary care tailored to every patient's needs. The expertise you need. The care you deserve.

ACROSS THE SPECTRUM OF HEALTH CARE

Our interventional radiologists are highly skilled in treating a wide range of health conditions, including:

Oncologic Conditions

- Bone metastases
- Kidney cancer
- Liver cancer
- Lung cancer

Gastrointestinal & Hepatobiliary

- Abscesses
- Biliary obstruction
- Gastrointestinal bleeding

Genitourinary

- Pelvic congestion syndrome
- Urinary obstruction
- Uterine fibroids
- Varicocele

Portal Hypertension

- Ascites
- Portal vein thrombosis
- Variceal bleeding

Venous & Hematologic

- Deep vein thrombosis
- Pulmonary embolism
- Superior vena cava syndrome
- Venous occlusive disease

KECK MEDICINE OF USC – INTERVENTIONAL RADIOLOGY

INTERVENTIONAL RADIOLOGY PROCEDURES OFFERED:

VENOUS ACCESS

- Chest port placement
- Chest port removal
- Tunneled catheter placement
- Tunneled catheter removal

DRAINS & TUBES

- Biliary drain exchange
- Biliary drain placement
- Chest tube placement
- Cholecystostomy tube exchange
- Cholecystostomy tube placement
- Drain/tube study abscessogram
- Gastrojejunostomy tube exchange
- Gastrojejunostomy tube placement
- Gastrostomy tube exchange
- Gastrostomy tube placement
- Nephrostomy tube exchange
- Nephrostomy tube placement
- Nephroureteral tube exchange
- Nephroureteral tube placement
- Suprapubic tube exchange
- Suprapubic tube placement
- Tunneled peritoneal drain placement
- Tunneled pleural drain placement
- Ureteral stent placement

DIAGNOSTIC

- Adrenal vein sampling
- Fluid aspiration
- Parathyroid vein sampling
- Pulmonary arteriography
- Soft tissue biopsy
- Transjugular liver biopsy

EMBOLIZATION

- Bronchial artery embolization
- Gastrointestinal hemorrhage embolization
- Genicular artery embolization
- Hepatobiliary hemorrhage embolization
- Pre-op tumor embolization
- Prostate artery embolization
- Pulmonary arteriovenous malformation embolization
- Renal hemorrhage embolization
- Renal tumor embolization
- Retroperitoneal hemorrhage embolization
- Splenic reduction embolization
- Thoracic duct embolization
- Trauma pelvis embolization
- Trauma spleen embolization
- Uterine fibroid embolization
- Uterine hemorrhage embolization
- Vascular malformation embolization/sclerotherapy
- Visceral (pseudo)aneurysm embolization

INTERVENTIONAL ONCOLOGY

- Cryoablation
- Percutaneous ethanol injection
- Thermal ablation
- Transarterial chemoembolization
- Transarterial embolization
- Y-90 radioembolization

PORTAL INTERVENTIONS

- Antegrade transvenous obliteration
- Portal vein embolization
- Portal vein recanalization
- Retrograde transvenous obliteration
- TIPS placement
- TIPS revision

DIALYSIS INTERVENTIONS

- Dialysis fistula/graft declot
- Dialysis fistulogram/graftogram

VENOUS INTERVENTIONS

- Chronic venous recanalization
- Deep vein thrombosis thrombectomy
- Inferior vena cava filter placement
- Inferior vena cava filter removal
- Pulmonary embolism thrombectomy/thrombolysis

SPINE

- Sacroplasty
- Vertebral augmentation

MISCELLANEOUS

- Biliary endoscopy
- Cyst sclerotherapy
- Foreign body retrieval
- Pain intervention
- Thyroid ablation
